

## Stand and Walk with Support

**Ideal for persons having fair strength in the legs but need some lateral support.**

**CAVA X-SITT provides more lateral support than a traditional walker with free rotating front forks and also more support than a rollator.**

Like on a bike, the handlebar connects to the front wheels. Further a spring cylinder helps steering the CAVA X-SITT.

Your body is stabilized by the body support. You have firm control of turning in tight spaces as well as in terrain.

Depending on your abilities you can walk indoor and outdoor and also on rough and soft ground. CAVA X-SITT can carry a small talk machine, cane, bag or favourite toy. It is easy to get in and out of CAVA X-SITT making it convenient:

- House/apartment/sidewalks
- Shopping centre/school/university
- Playground/park

### **Get on your feet and stay in the pack!**

Children and youngsters develop though interaction with peers and it is important to be able to move with your group.

Regular walking makes a big difference to your health and independence. It is good for your heart, lungs, muscles, metabolic systems and mental health.

Standing when others are standing – being at eye level – is really important to how others see you and how you see yourself!

### **CAVA X-SITT is a great choice if you:**

- Need stabilizing support in order to stand and walk, but not a saddle.
- Lack strength or control to walk with a rollator, but like to be more independent in outdoor surroundings.
- Search an equipment providing easy transferring on and off.
