

Stand and Walk with Support

FF X-SITT has arm and/or body support only giving a little more support for balance than a rollator.

Ideal for persons having good strength and some coordination in the legs but need some lateral support.

Your body is stabilized by the body support, but legs and body coordination is challenged maximal.

Depending on your abilities you can walk indoor and outdoor.

Regular walking makes a big difference to your health and independence. It is good for your heart, lungs, muscles, metabolic systems and mental health.

Standing when others are standing – being at eye level – is really important to how others see you and how you see yourself!

FF X-SITT may carry a small talk machine, cane, bag or favourite toy and is easy to get in and out of making it convenient for all day mobility at:

- House/apartment/solid ground areas
- Shopping centre/school/university
- Playground/park

FF X-SITT is a great choice if you:

- Need stabilizing support in order to stand and walk, but not a saddle.
- Lack strength or control to walk with a rollator, but like to be more independent in in/outdoor surroundings.
- Search an equipment providing easy transferring on and off.

Get on your feet and stay in the pack!

Children and youngsters develop though interaction with peers and it is important to be able to move with your group.
